

SPEKURA

For Apple TV 4K Gen 3

Installation instructions:

Position mount and align using a level.

Mark hole locations.

Remove mount.

Drill holes using a 3/16" bit.

Insert anchors flush to wall.

Install screws and secure mount to wall.

Slide upper catch upward.

Place Apple TV into the mount.

Slide upper catch downward until it clicks into place.

Install device with cables facing upward or downward as desired.

If the upper catch does not move freely, slightly loosen the top screw.

Ensure mount is secure before use.
